approx. \$15,000.00 total for 3 years	\$40.00 per day when at school	\$9.00	\$10.50	\$12.00

CURRENT TRAINING PROGRAMS

INDUSTRIAL MAINTENANCE TECHNICIANS are essential to any company with equipment that needs to be fixed; from the automotive to the medical industry. They are responsible for maintaining, monitoring and repairing production equipment on a daily basis and need knowledge in machining, electronics and programming. Industrial Maintenance Technicians learn to become great troubleshooters who understand how things work.

CNC MACHINING PROFESSIONALS produce specific parts and devices using Computer Numeric Control machines for all kinds of industries such as automotive, aerospace and medical. They review customer specifications, choose the proper tools and material and monitor every step of the production process from test to completion. Accuracy and precision are essential to become a great CNC Machining Professional.

PARENT NEWS FLASH!

Manufacturing is not what it used to be. Modern companies work in very clean and high-tech environments producing sophisticated products. We are looking for future technology leaders - specialists who will get to know the company and its products inside and out.

The ICATT program allows your daughter or son to truly learn while they earn and gain experience in a high demand field with great earning potential! ICATT provides theoretical training, hands-on experience, an associate degree, additional international certification, increasing hourly wages and job security for at least two years after graduation.

ICATT apprentices are tomorrow's leaders in manufacturing and technology. For more information, please visit www.thinkicatt.com!
